Rich is a nice guy who has been very good about working with EPA at the Superfund Site. Please contact him. I emailed him that I am on detail and on maternity leave.

Barbara,

I left you a phone message about this. ExxonMobile wants their contractor Linde AG Engineering, to transport new equipment using the east bank of the San Jacinto River, just south of I 10. This would go right through the area that the Superfund Respondents fenced off in accordance with the TxDOT/Respondents Fence Licensing Agreement.

Linde (Jochen Helfers) said that he had contacted Gary Miller PE in EPA Region 6. But there was no explanation of EPA's position on this proposal.

Can you please call me? 512 463-8634.

Thank you,
Rich O'Connell
TxDOT
Office of General Counsel

Drunk drivers wreck cars. And lives.
